Kevin Ang

Senior full-stack web engineer at **Longbeard**.

⊙ Canada   🌐 kevinang.com   ✉ ka@kevinang.com

About

I am well-versed in the humanities and philology, and a self-taught web engineer by trade. My development projects include sites, apps, and dev tools; mostly frontends, with backends as needed. I code frontends to meticulously match the designer's mock, and pleasing to the users. I take risks for the sake of faster iteration, growth, and user's joy. Having fast development cycles is key to a good end product.

Employment

● **Senior Web Engineer** / Longbeard   Since 2020

Full-stack web development (React, Next.js, PHP, WordPress, AI)

Data Coordinator / Catholic Peoples Foundation (Gallup NM, USA)   2017 – 2018

Graphic design and web development, donor management, fundraising

Projects

● **Magisterium AI** / magisterium.com   Since 2023

Generative AI for comprehensive theological research. I built the major part of the frontend & backend, from UI to user subscription journey, and continue optimizing performance of the LLMs. Powered by Next.js.

Videocast / videocast.app   2021 – 2022

Internal tool for Longbeard to automate the creation of video for social media, primarily as visual representation of podcasts. Powered by Remotion.dev + AWS Lambda.
